

HORIZONTAL GLASS DRILLING MACHINE

The Horizontal Glass Drilling Machine simplifies the process of drilling holes in glass sheets and comes with both upper and lower drilling bits.

Processing Capabilities

Hole Diameter: Ø4-Ø160 mm

Glass Thickness: 3-19mm

Table Height: 850mm

Volume: Low-Mid

FAST & ACCURATE
COMPACT DESIGN

EXTREMELY
ROBUST
STRUCTURAL
DESIGN

Key Features

A cylinder drives the lower drill bit while the upper bit is driven manually

Easy to transport, easy to install
